

RMO Report

VSA

20/08/2021

Due to the Covid Virus our normal functions with regards to Instructor training, OSA's, FIRC's and Ops in general were disrupted quite heavily in Victoria.

No instructor training was done this year but we hope in the next year we will start again as we do have pilots wanting to take up these roles

We have held a couple of FIRC's this year be it by Zoom or as a group meeting or 1 on 1.

OSA's are still happening with 3 being given an extension of 3 months.

Some of the earlier programs and initiatives have been embraced and carried through such as succession planning in the roll as CFI's and deputy CFI's.

New training manual for instructors is rolling forward and some great work has been done in getting it to where it is currently, a bit more time is needed before it can be rolled out in full.

On my visits around the state I have seen a couple of clubs making some quantum leaps in manage government grants and upgrading their sites with added runways and better facilities which in time would be capable of entertaining world comps.

The key at the moment is get current be current fly at every opportunity as that opportunity can be quickly lost.
